Executive Summary

GEI Consultants, Inc. completed an environmental corridor study, on behalf of TranSystems for the proposed sections of Route 79/Davol Street Corridor (the Corridor) in Fall River, Massachusetts. The Corridor will be subject to improvements as part of the Massachusetts Department of Transportation (MassDOT) comprehensive review of the transportation network along the eastern bank of the Taunton River.

Based on our evaluation of current conditions, and our review of available records, we identified 38 properties with potential environmental concerns within or abutting the Corridor consisting of evidence of a past, current, or future potential release of oil and hazardous material (OHM), which may affect the Corridor. These properties and their potential environmental concerns are summarized in Table ES-1 based on the information described below.

Historic Property Use within Corridor

Prior to the late 1880s, most of the Corridor consisted of vacant lots with some industrial, commercial, and residential use. When Route 79 was constructed from 1976 to 1977, many of these properties were repurposed for the roadway and land along the east bank of the Taunton River was backfilled in selected areas to create additional space. Based on subsurface investigations at adjacent properties, the material around the Corridor consists primarily of fill with significant amounts of coal, coal ash, wood, bricks, and other materials. Chemical testing of the fill by others has identified total petroleum hydrocarbon (TPH), polycyclic aromatic hydrocarbons (PAHs), extractable petroleum hydrocarbon (EPH), polychlorinated biphenyls (PCBs), and metal concentrations above applicable Massachusetts Contingency Plan (MCP; 310 CMR 40.0000) reportable concentrations.

The types of historic activities that are of potential concern within the Corridor include service stations, manufacturing and industrial facilities, coal yards, and a “wrecker’s yard.”

Based on this information, we have identified the historic filling of the area and general industrial use along the Taunton River as a potential environmental concern since contamination will likely be encountered during improvements of the Corridor.

Historic Use of Abutting Properties to the Corridor

Several properties abutting the Corridor were occupied by commercial, industrial, or manufacturing facilities that potentially used and/or stored OHM as part of their daily operations. There have been reported releases of OHM at some of these properties. At many of these properties there have not been reported releases of OHM, but there may have been releases that have not been identified and reported. The abutting properties that have the

potential to affect conditions at the Corridor are in Table ES-1. The types of historic and current activities that are of potential concern include:

- Historic and current drycleaners.
- Historic and current auto service stations
- Former and current manufacturing and industrial facilities
- Coal yards.
- Utilities facilities.
- A naval reserve center.

Open MassDEP-listed Disposal Sites

There are three properties with open Massachusetts Department of Environmental Protection (MassDEP) disposal sites with potential to affect conditions at the Property due to residual contamination or ongoing remediation and monitoring. These sites are located at 600 Davol Street (Release Tracking Number [RTN] 4-17012), 1000 Davol Street (RTN 4-24843), and 1244 Davol Street (4-1071).

Closed MassDEP-listed Disposal Sites

According to Environmental Data Resources (EDR) and available MassDEP online files, there are 23 closed disposal sites located potentially upgradient and/or adjacent to the Corridor that may affect environmental conditions at the Corridor. Since limited or incomplete documentation was available for two of these closed disposal sites at 101 President Avenue (RTN 4-10411) and 179-181 President Avenue (RTN 4-472), we have conservatively identified these properties as having the potential to affect conditions at the Corridor.

In addition, three of the 23 closed sites require an Activity and Use Limitation (AUL) to limit activities and uses that could result in risk from exposure to residual OHM in soil at the site: 1 Hathaway Street (RTN 4-17493) and 1082 Davol Street (RTNs 4-10766 and related RTN 4-11616).

USTs and ASTs

Six properties that abut or are upgradient to the Corridor have had petroleum underground storage tanks (USTs) and/or aboveground storage tanks (ASTs) on their premises: 156 President Way, 431 Davol Street, 1082 Davol Street, 1244 Davol Street, 1190 Davol Street, and 1 Hathaway Street. Only 431 Davol Street has tanks currently in use, however, past presence of one or more USTs or ASTs at these properties classifies them as potential properties of environmental concern. Except for 156 President Avenue and 1190 Davol Street, releases have been reported at all of the properties; however, only the site at 1244 Davol Street remains open.

Drycleaners

There is an active drycleaner at 181 President Way, and a historic drycleaner at 800 North Main Street, which are located upgradient and within 0.125 mile of the Corridor. The property is part of a closed disposal site (RTN 4-472); however, because the site is upgradient of the Corridor, a drycleaner continues to operate at 181 President Avenue, and limited information is available for RTN 4-472, the 179-181 President Avenue property has the potential to affect conditions at the Corridor.

Polychlorinated Biphenyls

Polychlorinated biphenyl (PCBs) have been identified and remediated a City Pier (600 Davol Street). Between December 2011 and June 2012, PCB remediation was performed and resulted in excavation and off-site disposal of approximately 5,800 tons of PCB contaminated soil, and consolidation under a cap of approximately 1,100 tons of PCB contaminated soil with concentrations greater than or equal to 1ppm, but less than 50 ppm PCBs. Although the site has been remediated, no documentation of regulatory closure under the MCP or Toxic Substances Control Act (TSCA) is available. Based on the proximity of historic soil contamination to Davol Street and the absence of final site closure documentation, these releases at City Pier have the potential to affect conditions at the Corridor.

Site Reconnaissance

During our site reconnaissance we observed several properties of potential environmental concern, including:

- Massachusetts Electric Company (National Grid) Substation #106 at 1 Hathaway Street.
- A drycleaner at 181 President Avenue (Abrite Quality Cleaners).
- An active gas station at 431 Davol Street (Global Gas).
- Auto sales, service, and repair shops at 156 President Avenue and 1148 Davol Street.

Recommendations

Based on the historic and current uses of properties located adjacent or directly upgradient to the Corridor and the historic filling of the area, we recommend conducting subsurface investigations along the Corridor and pre-characterizing soil prior to construction. We also recommend groundwater sampling if dewatering is planned during improvements of the Corridor.

Table ES-1. Properties of Potential Environmental Concern
Environmental Corridor Study
Route 79/Davol Street
Fall River, Massachusetts

Current Address	Current Property Use	Historic Property Use	ASTs or USTs in-use	MassDEP Information	
				RTNs	Open/Closed Sites

1. AUL = Activity and Use Limitation
2. MassDEP = Massachusetts Department of Environmental Protection
3. RTN = Release Tracking Number
4. UST = Underground Storage Tank
5. AST = Aboveground Storage Tank

1. Introduction

GEI Consultants, Inc. completed an environmental corridor study, on behalf of TranSystems for the sections of Route 79/Davol Street Corridor (the Corridor) along the eastern bank of the Taunton River in Fall River, Massachusetts (Fig. 1 and Fig. 2a). The Massachusetts Department of Transportation (MassDOT) is evaluating the Corridor for potential transportation improvements that will facilitate economic development along the waterfront.

1.1 Purpose

The purpose of this environmental corridor study was to:

- Identify potential environmental concerns indicating evidence of a past, current, or future potential release of oil and hazardous material (OHM), at or affecting the Corridor.

1.2 Scope of Services

In accordance with the subcontract agreement between TranSystems and GEI executed on August 1, 2018, we:

- Reviewed available historic reports for the Corridor.
- Reviewed federal and state regulatory database records pertaining to the Corridor and the surrounding area.
- Performed a site visit at the Corridor.
- Prepared this Environmental Corridor Study Report.

This report summarizes the information that we gathered as part of the study.

1.3 Significant Assumptions

Our conclusions and recommendations are based on the information sources presented in this report and listed in Section 7 (References), and a site visit to the Corridor. GEI assumes that all available information obtained as part of this corridor study including database records, and historic information is accurate and reliable.

2. Property Description

2.1 Property Location

The Corridor is a 1.2-mile-long area that is up to approximately 600 feet wide and includes existing portions of Davol Street to the north and Route 79 to the south. The Corridor is located along the western side of the City of Fall River and the eastern bank of the Taunton River. The Corridor begins at Cedar Street to the south and ends at the Veterans Memorial Bridge to the north (Fig. 1). Properties of potential environmental concern are listed in Table 1 and shown on Figure 2b.

2.2 Current Use of the Property

The Corridor is owned by MassDOT and is comprised of Route 79 and Davol Street. The Corridor includes traffic signals, signage, guardrails, median barriers, intersections with nearby streets, landscaping, and a shared use path.

2.3 Current Use of the Adjoining Properties

The land east of the Corridor is primarily high-density residential properties and some commercial and industrial properties. The land west of the Corridor, between Davol Street and the Taunton River, is primarily commercial and industrial properties. Commercial and industrial land use includes office and retail space, manufacturing facilities, an electrical substation, auto service shops, and gas station. Bicentennial Park also abuts the Corridor to the west.

3. Records Review

During preparation of this report, GEI reviewed information from the sources presented below including a state and federal database search report prepared by Environmental Data Resources (EDR) of Shelton, Connecticut (Section 3.1), MassDEP online files (Section 3.2), Sanborn Fire Insurance Maps and Aerial Photographs (Sections 3.3 and 3.4) for information related to the potential use and/or release of OHM along the Corridor. Numerous sites where OHM was used and releases have occurred are located along the Corridor. Our evaluation of the sites was initially based on the following criteria:

- Current and historic site use and distance from the Corridor.
- Date of the release.
- Number of releases at a site.
- Regulatory status.

Based on our review of the sites presented in the EDR report, Sanborn Insurance Maps, and Aerial Photographs relative to the criteria listed above, GEI identified the sites listed in Tables 2 and 3 that have the potential to have released OHM and significantly impacted soil and/or groundwater conditions along the Corridor. Next, we reviewed additional information provided by the EDR report or available MassDEP online files for these sites and evaluated them relative to the criteria listed below:

- OHM type and volume stored or released
- Site location relative to the likely groundwater flow direction.
- The extent to which the release was delineated and the size of the release.
- The media impacted by the release (e.g. soil, groundwater, etc.).

Based on our review of the EDR report and MassDEP files relative to the criteria listed above, we reduced the number of sites identified in Tables 2 and 3 believed to have impacted conditions along the Corridor. This information and our observations during a visit to the Corridor (Table 4), resulted in the list of properties of potential environmental concern listed in Table 1 and summarized in Section 5.

3.1 Standard Environmental Records Sources

EDR conducted a search of federal and state databases for sites within approximately 1 mile of the Corridor. A copy of the EDR report is in Appendix A.

The EDR report was reviewed for sites that could potentially affect environmental conditions at the Corridor. Although we reviewed sites within approximately 1 mile of the Corridor,

it is our opinion that sites greater than 0.125 mile from the Corridor are generally not likely to affect environmental conditions at the Corridor; therefore, they are not summarized below. Comprehensive listings of sites up to one mile from the Corridor are in the EDR Report in Appendix A. Based on information provided by EDR, sites within 0.125 mile of the Corridor are summarized in Table 2.

3.1.1 MassDEP Disposal Sites

According to EDR and MassDEP, one disposal site identified by Release Tracking Number (RTN) 4-19849 is located within the Corridor on Davol Street; however, the site was listed for release of 20 gallons of hydrogen peroxide, which was remediated to background levels and the release was closed.

According to EDR, and based on topography, there are 26 MassDEP disposal sites located on 18 properties either abutting the Corridor or within 0.125 miles and potentially upgradient of the Corridor that may affect environmental conditions at the Corridor (Table 2). In addition to these 26 sites, EDR identified a spill at 916 Bay Street within 0.125 miles of the Corridor; however, upon review we determined the site is at least 2 miles from the Corridor. Of these 26 sites, 23 have achieved a Permanent Solution or require no further action. Of these 23 closed sites, three require an Activity and Use Limitation (AUL) to limit activities and uses that could result in risk from exposure to residual OHM in soil and/or groundwater at the site. These AUL sites are summarized in Section 3.1.3 and discussed further in Section 3.2. The three remaining sites that have not achieved a Permanent Solution are located at Bicentennial Park at 1000 Davol Street (RTN 4-24843), the Former Coca Cola Bottling Company at 1244 Davol Street (4-1071), and at City Pier on Davol Street (RTN 4-17012). These three sites abut the Corridor and have not achieved regulatory closure, and therefore have potential to affect conditions at the Corridor. These disposal sites are further discussed in Section 3.2.

3.1.2 Other State and Federal Database Sites

According to EDR and based on topography, other state and federal databases identified sites that could potentially affect conditions in the Corridor (some of these sites are also MassDEP disposal sites) and include:

- Five registered underground storage tank (UST) properties potentially upgradient and/or adjacent to the Corridor may affect environmental conditions at the Corridor (Table 2): 156 President Avenue, 431 Davol Street, 1244 Davol Street, 1 Hathaway Street, and 1190 Davol Street. The 431 Davol Street property is also listed as having a registered aboveground storage tank (AST); however, only two active 10,000-gallon gasoline USTs are identified under the details provided for the property by EDR. Releases have occurred at 431 Davol Street, 1244 Davol Street and 1 Hathaway

Street. Based on their proximity to the Corridor, we reviewed available records for these sites as discussed in Section 3.2.

- Eight hazardous waste generators potentially upgradient and/or are adjacent to the Corridor (Table 2). The 870 North Main Street property is a Resource Conservation and Recovery Act (RCRA) Large Quantity Generator (LQG); the properties at 753 Davol Street and 181 President Avenue are RCRA Conditionally Exempt Small Quantity Generators (CESQG). There are also 5 historic hazardous waste generators (RCRA Non-Generators) at 753 Davol Street, 870 North Main Street, 1148 Davol Street, 1244 Davol Street, and 1 Hathaway Street. No violations have been reported for the 870 North Main Street or 753 Davol Street Sites. There have been reported releases associated with the 81 President Avenue, 1148 and 1244 Davol Street, and Hathaway Street sites which are further discussed in Section 3.2.
- EDR identified 14 historic auto stations that either abut or are upgradient and within 0.125 mile the Corridor (Table 2). According to EDR, historic auto stations include gas stations, filling stations, and service shops. In addition, 11 historic auto stations were identified based on a review of Sanborn Fire Insurance Maps (Section 3.4). Use as a historic auto station classifies these properties as potential properties of environmental concern. In addition, releases have been reported at three of these properties: 431 Davol Street, 1148 Davol Street, and 179-181 President Avenue (Section 3.2).
- There is an active drycleaner at 179-181 President Way, and a historic drycleaner at 812 N Main Street, which are located upgradient and within 0.125 mile of the Corridor. EDR also identifies the active drycleaner at 179-181 President Avenue as a RCRA-CESQG for tetrachloroethylene (PCE) and trichloroethylene (TCE). A release has been reported for the drycleaner at 179-181 President Avenue, which is further discussed in Section 3.2.1.3.

3.1.3 AULs and other Environmental Liens

There are no AULs on the Corridor, nor are there any known environmental liens.

According to EDR, there are four disposal sites located on three properties with AULs that are located potentially upgradient and adjacent to the Corridor that may affect environmental conditions at the Corridor. However, based on a review of available MassDEP records (Section 3.2), one of these sites located at 1148 Davol Street is erroneously identified as having achieved closure with an AUL, but was closed without an AUL or regulatory conditions. The two properties with AULs that are located potentially upgradient and/or adjacent to the Corridor are further discussed in Section 3.2, and are:

- The Hathaway Street Substation located at 1 Hathaway Street is a MassDEP disposal site (RTN 4-17493) for a release of No. 6 fuel oil. Oil-impacted soil was encountered

during excavation activities near of a former 1,890,000-gallon AST. An AUL was required to limit potential exposure to petroleum contaminated soil. The Former Quaker Fabric Plant located at 1082 Davol Street is listed disposal site for a release of No. 4 fuel oil from a leaking 10,000-gallon UST (RTN 4-10766 and related RTN 4-11616). An AUL was required to limit potential future exposure to greater than ½-inch of light non-aqueous phase liquid (LNAPL) at depths greater than 15 feet at the site.

3.2 Additional Environmental Records Sources

3.2.1 MassDEP Records

As identified in Section 3.1.1, and according to EDR, there are 26 MassDEP listed sites or spills within 0.125 mile of the Corridor that have the potential to affect conditions at the Corridor. We reviewed the online MassDEP database and the historic spills database between October 15 and November 1, 2018, to obtain additional information about these disposal sites. Information obtained from the online review is summarized below. A copy of the historic MassDEP Database search results is in Appendix B and relevant figures from the summarized reports are in Appendix C.

During this search we identified 9 additional historic spills that occurred between 1980 and 1993 located adjacent to the Corridor (Appendix B); however, one of the spills appears to have been a release to the Taunton River from an outfall from Davol Street (S90-0336). All the spills have been closed. Based on the age of the spills and their closed regulatory status, they are not expected to affect conditions at the Corridor. Spills that occurred on properties with subsequent MCP response actions are summarized in Sections 3.2.1.1 through 3.2.1.8. Additional closed spills included:

- S89-0782: Gasoline fumes reported near the former Davol Street service station at 697 Davol Street.
- S93-0336: A release of No. 6 fuel oil at the 785 Davol Street property.

3.2.1.1 Hathaway Street Substation, 1 Hathaway Street (RTN 4-11321, 4-15133, and 4-17493)

S87-0473

On July 28, 1987, an unknown quantity of transformer oil was released from a capacitor at the East Edison Substation. The release was subsequently closed.

S89-0346

On May 24, 1989, an unknown quantity of transformer oil was released from a capacitor at the East Edison Substation. The release was subsequently closed.

RTN 4-11321

In February 1995, ABB Environmental Services, Incorporated (ABB) conducted subsurface investigation at the substation. ABB reported total petroleum hydrocarbons (TPH), polycyclic aromatic hydrocarbons (PAHs), and metals in soil at concentrations exceeding MCP soil category S-1 reportable concentrations for (RCS-1) at the site. In 1996, approximately 600 tons of contaminated soil was excavated for off-site disposal. Foster Wheeler Environmental Corporation submitted a Release Abatement Measure (RAM) Completion Report and Permanent Solution with No Conditions (formerly Class A-2 Response Action Outcome [RAO]) in July 1997.

RTN 4-15133

In November 1999, Green Environmental, Incorporated (Green) observed separate phase oil in the soil around a former oil supply line for a 47,250-gallon No. 6 AST. Green notified MassDEP of the release and MassDEP assigned RTN 4-15133 and granted verbal approval to conduct an Immediate Response Action (IRA). Cleanup activities included excavating 871 tons of petroleum-impacted soil and cleaning, cutting, and capping of the former oil line. Green installed three groundwater monitoring wells the vicinity of the release after IRA actives. Petroleum compounds were not detected in the confirmatory soil and groundwater samples. Green submitted a Permanent Solution with No Conditions (formerly Class A-2 RAO) on March 2, 2000.

RTN 4-17493

In November 2002, No. 6 fuel oil impacted soil was encountered during excavation activities near a former 1,890,000-gallon AST. C11-C22 aromatic hydrocarbon fractions were detected at concentrations exceeding applicable MCP RCS-1 values. Approximately three cubic yards of petroleum-impacted soil was excavated and transported off site for disposal. It was determined that further excavation to achieve or approach background conditions would be prohibitively costly and could potentially result in a significant disruption of public electric distribution service. Lightship Engineering completed a Method 1 Risk Characterization for this disposal site, which determined there to be no significant risk of harm to human health with the implementation of an AUL. A Permanent Solution with Conditions (formerly Class A-3 RAO) was submitted to MassDEP on March 3, 2005.

The releases and spills described above have achieved regulatory closure and are not expected to affect conditions at the Corridor. However, based on the current and historic use of the Property as an electrical substation, we have retained this property as one of potential environmental concern (Section 3.4).

3.2.1.2 101 President Avenue (RTN 4-10411)

MassDEP was notified of a release of petroleum at the 101 President Avenue property on April 8, 1994 and assigned RTN 4-10411. No additional documentation for this release was available from the MassDEP database; however, the disposal site was closed with a Class B-1 RAO. Since no documentation was available for this site, and it has historically been an industrial property, occupied at one time by a brewery (Section 3.4), we have conservatively identified the property as having potential to affect conditions at the Corridor.

3.2.1.3 179-181 President Avenue (RTN 4-472)

A 1987 due diligence investigation identified the presence of volatile organic compounds (VOCs) and petroleum compounds in soil and groundwater at the 179 and 181 President Avenue properties, which were occupied by a fruit and flower wholesale distributer, and drycleaner, respectively. Elevated concentrations of VOCs, particularly vinyl chloride, resulted in MassDEP assigning RTN 4-472 to the site. In 1995, Clean Harbors completed an LSP Evaluation Opinion of the site and concluded that the initial detection of vinyl chloride was due to sampling and/or laboratory error and that no further response actions were required. Because the site is upgradient of the Corridor, a drycleaner continues to operate at 181 President Avenue, and limited information is available for RTN 4-472, the 179-181 President Avenue properties have potential to affect conditions at the Corridor.

3.2.1.4 392 Davol Street (RTN 4-24533)

In 2012, Jacobs Engineering, Inc. conducted a due diligence investigation and identified chromium in soil above the applicable MCP reporting limits. However, based on a subsequent subsurface investigation in 2013, Jacobs concluded that contamination was associated with urban fill and is not the result of a sudden release. The site has achieved regulatory closure and is located hydraulically downgradient to the Corridor; however, since urban fill is present, and it was historically used as a coal yard (Section 3.4) we have retained the property as one of potential environmental concern (Table 1).

3.2.1.5 431 Davol Street (RTN 4-870)

In October 1989, Haborline Engineering, Inc. conducted a subsurface investigation and observed petroleum impacted soil near three 5,000-gallon gasoline USTs. On March 19, 1990, MassDEP issued a Notice of Responsibility (NOR) for the release and assigned RTN 4-870.

On June 26, 1991, an OHM/Spill Incident Report was submitted MassDEP when jar headspace readings greater than 100 parts per million (ppm) were detected in soil during removal of the gasoline USTs. MassDEP assigned Spill S91-0350. Approximately 360 cubic yards of soil were removed during the UST removal. It appears the spill number

was later closed and additional response actions were conducted under RTN 4-870. Additional response actions appeared to consist of assessment activities only.

In December 2003, and as the result of Administrative Consent Order (ACO) between MassDEP and Battleship Cove Gas, the site achieved a Permanent Solution (formerly Class A-2 RAO). Although the site is closed, the gas station is still present, and therefore, the 431 Davol Street property is a site of potential environmental concern.

3.2.1.6 Bicentennial Park, 1000 Davol Street (RTN 4-24843)

In 2015, CDM Smith performed subsurface investigation for a Phase II Comprehensive Site Assessment at Bicentennial Park located at 1000 Davol Street and identified elevated metal concentrations (zinc and cadmium) in soil. The site is currently in Phase III of comprehensive response actions under the MCP. Since the site abuts the Corridor and has not achieved regulatory closure, it may affect conditions at the Corridor.

3.2.1.7 Quaker Fabric Plant, 1082 Davol Street (RTN 4-10766 and 4-11616)

RTN 4-10766

A release of No. 4 fuel oil occurred during the removal of a 10,000-gallon UST at the former textile manufacturing facility. On September 15, 1994, the property owner, Quaker Fabric, notified MassDEP of the release. MassDEP then assigned RTN 4-10766 and approved IRA activities including excavation of petroleum contaminated soil. Approximately 280 cubic yards of contaminated soil was later taken off site for disposal.

RTN 4-11616

In 1995, Supplemental site investigation activities identified more than ½-inch of LNAPL in a monitoring well located downgradient to the former UST, triggering a reporting condition that was assigned RTN 4-11616. After further assessment to determine the extent of the LNAPL, RTN 4-10766 and RTN 4-11616 were linked.

In September 2001, an AUL was recorded on the property to limit potential future exposure to greater than ½ inch of LNAPL at depths greater than 15 feet deep at the site. Following implementation of the AUL a Permanent Solution with Conditions (former Class A-4 RAO) was submitted to MassDEP for the site. Although the property is adjacent to the Corridor, according to the figure in Appendix C, the limits of the disposal site (and AUL area) appear to be limited to a small area approximately 250 feet west of the Corridor. Due to the relative immobility of No. 4 fuel oil in soil and groundwater and the distance of the site from the Corridor, the disposal site is not expected to impact conditions at the Corridor. However, based on historic use as a cotton mill and manufacturing facility, this site has the potential to affect conditions at the Corridor.

3.2.1.8 1148 Davol Street (RTN 4-0020734)

In April 2007, a release of gasoline was reported during removal of former USTs on the east side of the site. Subsurface investigation by Southcoast Environmental found levels of EPH and chromium above applicable MCP Reportable Concentrations for Soil Category RCS-1. No remedial actions were conducted, but based on a September 2007 Risk Characterization, as condition of No Significant Risk (NSR) exists and the site was closed with a Class B-1 RAO. In September 2007, Southcoast Environmental submitted a site assessment indicating No Significant Risk (formerly Class B-1 RAO). Although this disposal site has achieved closure, we have retained 1148 Davol Street as a property of potential environmental concern based on its historic use as a foundry and historic auto service station (Section 3.4).

3.2.1.9 1244 Davol Street (RTN 4-1071 and 4-13009)

RTN 4-1071

During an environmental site assessment in 1991, U.S. Technical Environmental Consulting, Inc. located five USTs within the property. The five USTs were removed from the property in September 1991 by Zecco, Inc. but contaminated soil remained adjacent to a former 8,000-gallon No. 2 fuel oil UST. The release was initially issued OHM/Spill Incident Report S91-0552 and then assigned RTN 4-1071 following promulgation of the MCP in 1993.

RTN 4-13009

Supplemental site investigation activities identified six inches of LNAPL in a monitoring well located downgradient to the former UST, triggering a reporting condition that was assigned RTN 4-13009. After further assessment to determine the extent of the LNAPL, RTN 4-01007 and RTN 4-13009 were combined in May of 1998 during Tier Classification.

A RAM was conducted by Arcadis in 1999, during which approximately 1,275 tons of petroleum-impacted soil and 89,675 gallons of oily water were removed or treated. Ongoing remediation and monitoring continue at the site. This site remains open under the MCP and is in Remedy Operation Status (REMOPS). In the most recent Phase V Remedy Operation Status (ROS) Report filed on July 9, 2018, GHD Services Inc. concluded that a condition of NSR exists, but identification of a remedy that would achieve a Permanent Solution are on-going. Because the site has not achieved a Permanent Solution, RTN 4-1071 may affect conditions at the Corridor.

3.2.1.10 City Pier, 600 Davol Street (RTN 4-10173, 4-17012, 4-18498, 4-18690, and 4-26556)

S89-0015

In 1989, a release of waste oil from a UST occurred at the 609 Davol Street (i.e., City Pier or 600 Davol Street) property. The release was subsequently closed.

RTN 4-10173

On December 23, 1993, MassDEP was notified of a release of 30 gallons of waste oil at City Pier on Davol Street. The oil was released onto the paved pier and was cleaned by Clean Harbors the same day. Although MassDEP issued RTN 4-10173, cleanup of the release was overseen by the U.S. Coast Guard and is considered "Adequately Regulated" by MassDEP.

RTNs 4-17012 and 4-18690

In August 2001, field investigation by Metcalf & Eddy identified concentrations of PCBs in the soil above RCS-1 values. MassDEP was notified of the release on April 17, 2002 and assigned RTN 4-17012.

During subsequent investigations, a surficial soil sample with 140 ppm PCBs was detected within 500 feet of the Point Gloria Condominium Complex located on an adjacent property, and MassDEP was notified of a potential Imminent Hazard condition on September 22, 2004. MassDEP assigned RTN 4-18690 to the condition and approved an IRA to address the Imminent Hazard condition. The IRA included covering the PCB-impacted area with geotextile fabric and six inches of soil. A six-foot high chain-link fence with a locked gate was also installed to limit access to the southwest area of the site with high levels of PCB-contamination. An IRA Completion Report was submitted on July 14, 2005, and RTN 4-18690 was linked with RTN 4-17012.

Subsequent comprehensive response actions consisted primarily of additional assessment. Since PCB concentrations exceeded 50 ppm, these assessments were performed under both the MCP and the federal Toxic Substances Control Act (TSCA) regulations at 40 CFR 761.

In 2010, a Temporary Solution (Class C RAO) was submitted for the Property; however, additional work was planned to meet TSCA requirements. Conditions of the Temporary Solution Require semi-annual inspections of hardscaping and fences to ensure access to site soils continues to be limited pending completion of TSCA activities.

In a 2011, TSCA Risk-Based Cleanup Plan and RAM Plan, Beta Group identified a remediation strategy consisting of removal of soils with greater than 100 ppm of PCBs, construction of clean utility corridors, and construction of an engineered barrier as defined by the MCP, and the implementation of an AUL to require maintenance of ground cover.

Between December 2011 and June 2012, PCB remediation was performed and resulted in excavation and off-site disposal of approximately 5,800 tons of PCB contaminated soil, and consolidation under a cap of approximately 1,100 tons of PCB contaminated soil with concentrations greater than or equal to1ppm, but less than 50 ppm PCBs. Results of the remediation were submitted to MassDEP in a RAM Status Report, dated September 14, 2017. To date, a RAM Completion Report has not been filed.

A URAM Plan for repairs to an outfall outside the limits of the PCB contamination was submitted to MassDEP on October 9, 2017. No additional documents are available for the work; however, the LSP of Record for the work resigned in August 2018.

RTN 4-18498

On June 17, 2004, MassDEP was notified of a release of TCE and PCE. There are no files available at MassDEP online, but the disposal site was closed and classified as "RAO Not Required" the same day as MassDEP notification. Consequently, the site is not expected to affect conditions at the Corridor. Tighe & Bond determined that contamination has been reduced to background levels and the site achieved a Permanent Solution with No Conditions (formerly Class A-1 RAO).

RTN 4-26556

On February 22, 2017, MassDEP was notified of an oil sheen on the Taunton River near City Pier. The oil was likely dumped from a 5-gallon bucket found at the site. The Fall River Fire Department documented the release but determined the sheen was not recoverable. During an inspection the following day, a sheen was not observed on the river and no further action was recommended. MassDEP assigned RTN 4-26556 and determined the site is Adequately Regulated and is therefore not expected to affect conditions at the Corridor.

Six disposal sites have been identified at the City Pier Property. Two of these releases (RTNs 4-10173 and 4-26556) were to the Taunton River and determined to be adequately regulated by MassDEP and are therefore not expected to impact conditions at the Corridor. Similarly, RTN 4-18498 is not expected to affect the Corridor since contamination was reduced to background levels. However, the PCB release tracked under RTNs 4-10173 and 4-18690 have the potential to affect conditions at the Corridor.

According to the Figures in Appendix C, soil with elevated PCB concentrations has been identified near the gate and at the southern property edge near Davol Street. Although the site has been remediated, no documentation of regulatory closure under the MCP or TSCA is available. Based on the proximity of historic soil contamination to Davol Street and the absence of final site closure documentation, these releases at City Pier have the potential to affect conditions at the Corridor.

3.3 Historical Use Information of the Corridor

Historical use of the Corridor was obtained from Sanborn Maps from 1888 to 1976 and Aerial Photographs from 1952 to 2016. Sanborn Maps and Aerial Photographs are in Appendices D and E, respectively.

Davol Street and abutting residential, commercial, and industrial properties were present prior to 1888. When Route 79 was constructed from 1976 to 1977, land along the east bank

of the Taunton River was backfilled in areas to create additional space for the roadway. The construction of Route 79 replaced an existing lumber yard, various industrial and commercial properties, residential buildings, and vacant lots. The Veterans Memorial Bridge to the north of the Corridor was constructed in 2008.

3.4 Historical Use Information on Abutting Properties

Historical use of the properties abutting the Corridor was obtained from Sanborn Maps from 1888 to 1976 and Aerial Photographs from 1952 to 2016. The current property addresses are listed below, however, the associated historic addresses and property information are summarized in Table 3. The information is summarized in Table 3.

The historic land use of properties abutting the Corridor has included a mix of residential, commercial, and industrial properties. Based on their historic industrial use, the following abutting properties are considered properties of potential environmental concern:

- Historic Auto Service Stations – Historic filling stations or auto service garages were located at 431, 600, 729, 1000, 1148, and1190 Davol Street, the property at Davol and Pearce Streets, 90 Norfolk Street, 101, 126, 156, and 179-181 President Avenue, 201 and 204 Remington Avenue. Of these properties, only four are currently still in operation as a filling station or auto service garage: 431, 729, and 1148 Davol Street and 156 President Avenue. The auto stations at 431 and 1148 Davol Street and 179-181 President Avenue have reported releases and are further discussed in Sections 3.2.1.
- 1000 Davol Street – From approximately 1905 to 1976, this property was used for coal storage and shipping by the Bowenville Coal Company. This property also contained a portion of the 1 Hathaway Street substation from 1952 until renovations between 1970 and 1977 and a filling station from 1950 to 1974. The property was converted into Bicentennial Park in the late 1970s and is discussed further in Section 3.2.1.5.
- 1 Hathaway Street – This site began operations as a 2.5-megawatt oil/coal-fired power plant in 1906. During renovations to existing structures, a large AST on the property was removed between 1970 and 1977. Since the 1970s, the property has been used as an electric substation by the Massachusetts Electric Company and is operated by National Grid (substation #106). This property is discussed further in Section 3.2.1.1.
- 392 Davol Street– This property along the Taunton River was used for shipping and storage of coal by the Staples Coal Company from approximately 1893 to 1970. The property has been a restaurant and parking lot since approximately 1977.

- 533-609 Davol Street – The property was occupied by a grist mill and meat packing facility from at least 1888 until approximately 1905. The buildings have remained present since that time. The use after 1976 is unknown, but between 1905 and 1976, the buildings were used for grain and cotton storage.
- 600 Davol Street – This property, also known as "the City Pier" was occupied by the Cook Borden Company lumber and building materials yard between approximately 1888 and 1976, when a portion of the property became the Wharf Boat Yard. The property has been vacant since 2008. The Fall River Redevelopment Authority plans to repurpose this property for use as a public park and marina. This property is discussed further in Section 3.2.1.7.
- Davol and Turner Street (northeast corner of intersection, formerly 665-687 Davol Street) – This property was historically a grist or feed mill from at least 1888 until sometime between 1905 and 1933. Buildings remained at the property until approximately 1966 and were for storing "mason materials" between 1933 and 1952. The property was development into a parking lot in approximately 1981.
- Davol and Turner Street (southeast corner of intersection) – The Fall River Gas Company operated on this property from 1888 to 1905. By 1933 the property was vacant, and the large AST used by Fall River Gas Company had been removed. The lot was sold in 2013 to the natural gas company Liberty Utilities and remains vacant.
- 61 Pearce Street – This property was the Eagle Stove Foundry from at least 1888 until approximately 1905. The current building was constructed in approximately 1933 and was used by a wholesale drug company until at least 1950. The building is currently occupied by a painting and wallpaper company.
- 101 President Avenue – Historically this property was occupied by a beer brewery from approximately 1905 to at least 1952. The building was demolished sometime between 1970 and 1976 and remained vacant until approximately 1981 when new commercial buildings and associated parking were constructed. Another portion of the property was used as an auto service garage from approximately 1933 to 1952.
- 1082 Davol Street – This property was used for storage and manufacturing by Weetamoe Cotton Mills from approximately 1905 to 1933. The building was used as a factory by Jefferson Electric Company beginning in 1933, and by 1976 was owned by Mechanics Company. The property is currently a commercial office building with various tenants, including Bristol Community College.
- 1148 Davol Street – This property was an iron foundry for the Mechanic's Foundry and Machine Company from approximately 1905 to 1952, with a filling station from 1933 to 1952. The property was then converted into a commercial warehouse, which is currently occupied by Performance Automotive Center and Heritage CrossFit.

- 1190 Davol Street – This property building was constructed sometime between 1966 and 1970. According to Sanborn Maps, the building was used as a clothing factory from at least 1976 until sometime before 1995, when it became office and manufacturing space for RectorSeal, a manufacturer of chemical specialty sealants and pumps. Another portion of the property was used as filling station from approximately 1933 to 1977.
- 1244 Davol Street – This property operated as a cotton mill from approximately 1905 until 1950, when it was used by Coca-Cola as a bottling plant. The plant remained in operation until sometime after 1976, but before 1992, when the property was taken over by RectorSeal for office space and manufacturing of pumps and chemical sealants (Rectorseal also occupies the 1190 Davol Street property). This property is discussed further in Section 3.2.1.9.
- 1338 Davol Street – From approximately 1950 to 1976 this property operated as a Naval Training Reserve Center. This property was later converted into a shipyard and docking area along the Taunton River. Based on aerial photographs, a set of three large ASTs were removed from the property between 1991 and 1995. The property now operates as a ship yard and warehouse for D&S Marine.

There have been reported releases of OHM at ten of the above listed properties: 1 Hathaway Street, 392, 431, 600, 1000, 1082, 1148, and 1244 Davol Street and 101 and 179-181 President Avenue. There may have been releases that have not been identified and subsequently not reported and, therefore, there is the potential for these abutting these properties to affect conditions at the Corridor. The properties with reported releases associated with them and are discussed in Section 3.2.

3.5 Historical Use Information on Properties Within the Corridor

Historical use of the properties within the Corridor was obtained from Sanborn Maps from 1888 to 1976 and Aerial Photographs from 1952 to 2016. The current property addresses are listed below, however, the associated historic addresses and property information are summarized in Table 3. The information is summarized in Table 3.

The historic land use of properties within he Corridor has included a mix of residential, commercial, and industrial properties. Based on their historic industrial use, the following abutting properties are considered properties of potential environmental concern:

- Historic Auto Service Stations – Ten other historic Auto Service Stations located within the Corridor were demolished during construction of Route 79 (450, 680, 1021-1025, 1055, 1119, 1299 Davol Street, 9, 14, and 36 Brightman Street, 20 Castle Street, and 37 Leonard Street).

- Route 79 (formerly 30 Wellington Street) – This property was a dry cleaner from approximately 1933 to 1952. Chlorinated solvents are often associated with dry cleaning activities and are a potential environmental concern. This site was demolished during construction of Route 79 in the 1970s.
- Route 79 (formerly 135 Leonard Street) – Although the property was demolished to construct Route 79 in the 1970s, it was briefly occupied by a "wrecker's yard" in approximately 1933.
- Route 79 (formerly 562 Davol Street) – This property was the WM F. Thomas coal yard from 1888 until approximately 1933. The property was vacant from 1933 until it was demolished in approximately in the 1970s to construct Route 79.
- Route 79 (formerly 564-568 Davol Street) – This property was used by the adjacent WM. F Thomas coal yard at 562 Davol Street from at least 1888 until approximately 1933. It was also used by the Cook Borden Lumber Yard at 600 Davol Street from approximately 1893 to 1933. After 1933, the property was occupied by the Keogh Storage Truck Garage until Route 79 was constructed in approximately 1977.
- Route 79 (formerly 680 Davol Street) – Along with the adjacent 600 Davol Street property, 680 Davol Street was part of the Cook Borden lumber yard from approximately 1888 until sometime between 1905 and 1933, when it became a filling station. The property remained a filling station until Route 79 was constructed in the mid-1970s.

There may have been releases that have not been identified and subsequently not reported and, therefore, there is the potential for these properties to affect conditions within the Corridor.

4. Site Visit

We visited the Corridor on November 9, 2018. The purpose of the site visit was to document current Corridor conditions and observe and document conditions related to the potential presence of OHM. We observed exterior portions of abutting properties from the Corridor but did not enter any properties. Site visit observations for selected abutting properties are summarized in Table 4. Photographs that we took during the site visit are in Appendix F.

We observed the following properties of potential environmental concern during the site visit:

- Massachusetts Electric Company (National Grid) Substation #106 at 1 Hathaway Street.
- A drycleaner at 181 President Avenue (Abrite Quality Cleaners).
- An active gas station at 431 Davol Street (Global Gas).
- Auto sales, service, and repair shops at 156 President Avenue and 1148 Davol Street.

We observed monitoring wells at 1 Hathaway Street, 431 Davol Street, and 1148 Davol Street. No evidence of spills or releases was observed at or adjacent to the Corridor at the time of the site visit.

5. Report Findings

GEI Consultants, Inc. completed an environmental corridor study, on behalf of TranSystems for the proposed sections of Route 79/Davol Street Corridor (the Corridor) in Fall River, Massachusetts (Fig. 1). The Corridor will be subject to improvements as part of the MassDOT comprehensive review of the transportation network along the eastern bank of the Taunton River.

Based on our evaluation of current conditions, and our review of available records, we identified 38 properties within and abutting the Corridor with potential environmental concerns consisting of evidence of a past, current, or future potential release of OHM, which may affect the Corridor. These potential environmental concerns are summarized in Table 1 based on the information described below.

Historic Property Use within the Corridor

Prior to the late 1880s, most of the Corridor consisted of vacant lots with some industrial, commercial, and residential use. When Route 79 was constructed from 1976 to 1977, many of these properties were repurposed for the roadway and land along the east bank of the Taunton River was backfilled in selected areas to create additional space. Based on subsurface investigations at adjacent properties, the material around the Corridor consists primarily of fill with significant amounts of coal, coal ash, wood, bricks, and other materials. Chemical testing of the fill by others has identified TPH, PAHs, EPH, PCBs, and metal concentrations above applicable MCP reportable concentrations.

- Ten historic auto service station were demolished during construction of Route 79 (450 Davol Street [c. 1950], 680 Davol Street [1933-1976], 1021-1025 Davol Street [1933-1976], 1055 Davol Street [1933-1976], 1119 Davol Street [1933-1976], 1299 Davol Street [1933-1976], 9 Brightman Street [1933-1970], 14 Brightman Street [1933-1970], 36 Brightman Street [1950-1952], 20 Castle Street [1933-1952], and 37 Leonard Street [1950-1952]).
- Six former manufacturing and industrial facilities were demolished during construction of Route 79 (450 Davol Street [1893-1933], 562 Davol [1888-1933], 564-568 Davol Street [1888-1933], 680 Davol Street [1888-1933], 20 Castle Street [1933-1952], and the property at Lindsey and Ballard Streets [1905-1952]).
- Two coal yards were demolished during construction of Route 79 (562 Davol Street [1888-1933] and 564-568 Davol Street [1888-1933])
- A “wrecker’s yard” at 135 Leonard Street (c. 1933) was demolished during construction of Route 79.

Based on this information, we have identified the historic filling of the area and general industrial use along the Taunton River as a potential environmental concern since contamination will likely be encountered during improvements of the Corridor.

Historic Use of Abutting Properties to the Corridor

Several properties abutting the Corridor were occupied by commercial, industrial, or manufacturing facilities that potentially used and/or stored OHM as part of their daily operations. There have been reported releases of OHM at some of these properties. At many of these properties there have not been reported releases of OHM, but there may have been releases that have not been identified and reported. There is the potential for the following abutting properties to affect conditions at the Corridor:

- Historic drycleaners: 800 North Main Street (1991-2013) and a property at Route 79, formerly 30 Wellington Street (1933-1950).
- Historic auto service stations: 431 Davol Street (1950-present), 600 Davol Street (1969-1970), 729 Davol Street (1933-1952, 2012-present), 1000 Davol Street (1950-1974), 1148 Davol Street (1933-52, 1969-1974, 2009-present), and 1190 Davol Street (1933-1976), the property at Davol and Pearce Streets (1933-1970), 90 Norfolk Street (2001-2005), 101 President Avenue (1933-1952), 126 President Avenue (1950-1974), 156 President Avenue (1933-present), 179-181 President Avenue (1933-1977), 201 Remington Avenue (1933-1970) and 204 Remington Avenue (1950-1986).
- Former manufacturing and industrial facilities: 392 Davol Street (1888-1976), 535-609 Davol Street (1888-1977), 600 Davol Street (1888-1976), 753 Davol Street (1950-1977), 1000 Davol Street (1905-1977), 1082 Davol Street (1905-1952), 1148 Davol Street (1905-1952), 1190 Davol Street (1970-1977), 1244 Davol Street (1905-1977), 1338 Davol Street (1905-1950), the properties at Davol and Turner Streets (1888-1933), 61 Pearce Street (1888-1905), and 101 President Avenue (1905-1952).
- Coal Yards: 392 Davol Street (1888-1976), 1000 Davol Street (1905-1977), 1082 Davol Street (c.1905), and the property at Davol and Turner Streets (1888-1933).
- Utilities: An electric substation at 1 Hathaway Street (1933-present) and Fall River Gas company at the intersection of Davol and Turner Streets (1888-1933).
- Other: A naval reserve center at 1338 Davol Street (1950-1977).

Open MassDEP-listed Disposal Sites

There are three properties with open MassDEP disposal sites abutting or upgradient and within 0.125 miles of the Corridor with potential to affect conditions at the Property due to residual contamination or ongoing remediation and monitoring. These sites are located at

600 Davol Street (RTN 4-17012), 1000 Davol Street (RTN 4-24843), and 1244 Davol Street (4-1071).

Closed MassDEP-listed Disposal Sites

According to EDR and available MassDEP online files, there are 23 closed disposal sites located potentially upgradient and/or adjacent to the Corridor that may affect environmental conditions at the Corridor. Since limited or incomplete documentation was available for two of these closed disposal sites at 101 President Avenue (RTN 4-10411) and 179-181 President Avenue (RTN 4-472), we have conservatively identified these properties as having the potential to affect conditions at the Corridor.

In addition, 3 of the 23 closed sites require an AUL to limit activities and uses that could result in risk from exposure to residual OHM in soil at the site: 1 Hathaway Street (RTN 4-17493) and 1082 Davol Street (RTNs 4-10766 and related RTN 4-11616).

USTs and ASTs

Six properties that abut and are upgradient to the Corridor have had petroleum USTs and/or ASTs on their premises: 156 President Way, 431 Davol Street, 1082 Davol Street, 1244 Davol Street, 1190 Davol Street, and 1 Hathaway Street. Only 431 Davol Street has tanks currently in use, however, past presence of one or more USTs or ASTs at these properties classifies them as potential properties of environmental concern. Releases have been reported at 431 Davol Street, 1082 Davol Street, 1244 Davol Street, and 1 Hathaway Street; only the site at 1244 Davol Street remains open.

Drycleaners

There is an active drycleaner at 181 President Way, and a historic drycleaner at 800 North Main Street, which are located upgradient and within 0.125 mile of the Corridor. EDR also identifies the active drycleaner at 181 President Avenue as a RCRA-CESQG for PCE and TCE. The property is part of a closed disposal site (RTN 4-472); however, because the site is upgradient of the Corridor, a drycleaner continues to operate at 181 President Avenue, and limited information is available for RTN 4-472, the 179-181 President Avenue property has the potential to affect conditions at the Corridor.

Polychlorinated Biphenyls

PCBs have been identified and remediated a City Pier (600 Davol Street). Between December 2011 and June 2012 PCB remediation was performed and resulted in excavation and off-site disposal of approximately 5,800 tons of PCB contaminated soil, and consolidation under a cap of approximately 1,100 tons of PCB contaminated soil with concentrations greater than or equal to 1ppm, but less than 50 ppm PCBs. Although the site has been remediated, no documentation of regulatory closure under the MCP or TSCA is

available. Based on the proximity of historic soil contamination to Davol Street and the absence of final site closure documentation, these releases at City Pier have the potential to affect conditions at the Corridor.

Site Reconnaissance

During our site reconnaissance we observed several properties of potential environmental concern, including:

- Massachusetts Electric Company Substation (National Grid) #106 at 1 Hathaway Street.
- A drycleaner at 181 President Avenue (Abrite Quality Cleaners).
- An active gas station at 431 Davol Street (Global Gas).
- Auto sales, service, and repair shops at 156 President Avenue and 1148 Davol Street.

Recommendations

Based on the historic and current uses of properties located adjacent or directly upgradient to the Corridor and the historic filling of the area, we recommend conducting subsurface investigations along the Corridor and pre-characterizing soil prior to construction. We also recommend groundwater sampling if dewatering is planned during improvements of the Corridor.

6. Limitations

This report was prepared for the use of TranSystems and MassDOT, exclusively. The conclusions presented in this report are based solely on the information reported in this report. Additional quantitative information regarding the Corridor that was not available to us may result in a modification of the findings above. The report has been prepared in accordance with generally accepted geohydrological practices. No other representations and no warranty, express or implied, is made.

General Notes:
Information from EDR Report dated October 15, 2018; and MassDEP online Sites Database, as of October 31, 2018.
AST = Aboveground Storage Tank.
CERCLIS-NFRAP = Archived Comprehensive Environmental Response, Compensation, and Liability Information System.
DPS = Downgradient Property Status.
FINDS = Facility Index System.
HW GEN = Generators of Hazardous Waste and Waste Oil.
INST CONTROL = Institutional Control/Activity and Use Limitation
LAST = Leaking Aboveground Storage Tank.
LSP = Licensed Site Professional.
LUST = Leaking Underground Storage Tank.
NA = Not Available.
NR = Not Reported.
PADS= PCB Activity Database System.
PCB = Polychlorinated Biphenols.
PNSC= Permanent Solution with No Conditions.
RAO = Response Action Outcome.
RCRA - SQG = Resource Conservation and Recovery Act - Small Quantity Generator.
RCRA- NonGen= Former RCRA generator.
REMOPS= Remedy Operation Status.
RGA HWS = Recovered Government Archive State Hazardous Waste
RGA LUST = Recovered Government Archive Leaking Underground Storage Tank
ROS = Remedy Operation Status.
SEMS-ARCHIVE= Superfund Enterprise Management System Archive
SHWS = State Hazardous Waste Site.
SPILLS = Historical Spills reported from mid-1980s to September 30, 1993.
STREMT = RAO Statement Retracted.
TCE = Trichloroethylene.
TPH = Total Petroleum Hydrocarbons.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL ---------- National Priority List
Proposed NPL ---------- Proposed National Priority List Sites
NPL LIENS ---------- Federal Superfund Liens

Federal Delisted NPL site list

Delisted NPL ---------- National Priority List Deletions

Federal CERCLIS list

FEDERAL FACILITY ---------- Federal Facility Site Information listing
SEMS ---------- Superfund Enterprise Management System

Federal RCRA CORRACTS facilities list

CORRACTS ---------- Corrective Action Report

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF ---------- RCRA - Treatment, Storage and Disposal

Federal institutional controls / engineering controls registries

LUCIS ---------- Land Use Control Information System
US ENG CONTROLS ---------- Engineering Controls Sites List
US INST CONTROL ---------- Sites with Institutional Controls

Federal ERNS list

ERNS ---------- Emergency Response Notification System

State and tribal landfill and/or solid waste disposal site lists

MA SWF/LF ---------- Solid Waste Facility Database/Transfer Stations

State and tribal leaking storage tank lists

INDIAN LUST ---------- Leaking Underground Storage Tanks on Indian Land

State and tribal registered storage tank lists

FEMA UST ---- Underground Storage Tank Listing
INDIAN UST ---- Underground Storage Tanks on Indian Land

State and tribal voluntary cleanup sites

INDIAN VCP ---- Voluntary Cleanup Priority Listing

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Landfill / Solid Waste Disposal Sites

INDIAN ODI ---- Report on the Status of Open Dumps on Indian Lands
DEBRIS REGION 9 ---- Torres Martinez Reservation Illegal Dump Site Locations
ODI ---- Open Dump Inventory
IHS OPEN DUMPS ---- Open Dumps on Indian Land

Local Lists of Hazardous waste / Contaminated Sites

US HIST CDL ---- Delisted National Clandestine Laboratory Register
US CDL ---- National Clandestine Laboratory Register

Local Land Records

MA LIENS ---- Liens Information Listing
LIENS 2 ---- CERCLA Lien Information

Records of Emergency Release Reports

HMIRS ---- Hazardous Materials Information Reporting System
MA SPILLS 90 ---- SPILLS 90 data from FirstSearch
MA SPILLS 80 ---- SPILLS 80 data from FirstSearch

Other Ascertainable Records

FUDS ---- Formerly Used Defense Sites
DOD ---- Department of Defense Sites
SCRD DRYCLEANERS ---- State Coalition for Remediation of Drycleaners Listing
US FIN ASSUR ---- Financial Assurance Information
EPA WATCH LIST ---- EPA WATCH LIST
2020 COR ACTION ---- 2020 Corrective Action Program List
TSCA ---- Toxic Substances Control Act
TRIS ---- Toxic Chemical Release Inventory System
SSTS ---- Section 7 Tracking Systems
ROD ---- Records Of Decision
RMP ---- Risk Management Plans
PRP ---- Potentially Responsible Parties
ICIS ---- Integrated Compliance Information System
FTTS ---- FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)
MLTS ---- Material Licensing Tracking System
COAL ASH DOE ---- Steam-Electric Plant Operation Data

COAL ASH EPA ---------- Coal Combustion Residues Surface Impoundments List
PCB TRANSFORMER ---------- PCB Transformer Registration Database
RADINFO ---------- Radiation Information Database
HIST FTTS ---------- FIFRA/TSCA Tracking System Administrative Case Listing
DOT OPS ---------- Incident and Accident Data
CONSENT ---------- Superfund (CERCLA) Consent Decrees
INDIAN RESERV ---------- Indian Reservations
FUSRAP ---------- Formerly Utilized Sites Remedial Action Program
UMTRA ---------- Uranium Mill Tailings Sites
LEAD SMELTERS ---------- Lead Smelter Sites
US MINES ---------- Mines Master Index File
ABANDONED MINES ---------- Abandoned Mines
UXO ---------- Unexploded Ordnance Sites
DOCKET HWC ---------- Hazardous Waste Compliance Docket Listing
MA DRYCLEANERS ---------- Regulated Drycleaning Facilities
MA GWDP ---------- Ground Water Discharge Permits
MA MERCURY ---------- Mercury Product Recyling Drop-Off Locations Listing
MA NPDES ---------- NPDES Permit Listing
MA TSD ---------- TSD Facility

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 07/17/2018 has revealed that there are 2 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
PRESIDENT AVENUE PRO	179-181 PRESIDENT AV	NNE 0 - 1/8 (0.046 mi.)	H41	115

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/01/2018 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/01/2018 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
RYDER TRUCK	119 COVE ST	NNE 1/8 - 1/4 (0.159 mi.)	L64	240

EPA ID:: MAR000509067

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 03/01/2018 has revealed that there are 4 RCRA-CESQG sites within approximately 0.25 miles of the target property.

State and tribal Brownfields sites

MA BROWNFIELDS: Under Massachusetts law, M.G.L. c. 21E is the statute that governs the cleanup of releases of oil and/or hazardous material to the environment. The Brownfields Act of 1998 amended M.G.L. c. 21E by establishing significant liability relief and financial incentives to spur the redevelopment of brownfields, while ensuring that the Commonwealth's environmental standards are met. Most brownfields are redeveloped with the benefit of liability protections that operate automatically under M.G.L. c. 21E.

A review of the MA BROWNFIELDS list, as provided by EDR, has revealed that there is 1 MA BROWNFIELDS site within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/01/2018 has revealed that there are 7 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

MA HW GEN: Permanent generator identification numbers for all Massachusetts generators of hazardous waste and waste oil that have registered with or notified MassDEP of their hazardous waste activities.

A review of the MA HW GEN list, as provided by EDR, and dated 06/04/2018 has revealed that there are 9 MA HW GEN sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste.

Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 2 EDR MGP sites within approximately 1 mile of the target property.

NEW ENGLAND GAS CO	66 5TH STREET	S 1/2 - 1 (0.821 mi.)	AB145	835

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 14 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist

Cleaner site within approximately 0.125 miles of the target property.

EDR RECOVERED GOVERNMENT ARCHIVES

Exclusive Recovered Govt. Archives

MA RGA HWS: The EDR Recovered Government Archive State Hazardous Waste database provides a list of SHWS incidents derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the Department of Environmental Protection in Massachusetts.

A review of the MA RGA HWS list, as provided by EDR, has revealed that there is 1 MA RGA HWS site within approximately 0.001 miles of the target property.

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR EMISSIONS CLASSIFICATION UNKNOWN

FINDS:

Registry ID: 110003435300

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Date form received by agency: 09/25/1986
Site name: PERFORMANCE AUTO CENTER INC
Classification: Conditionally Exempt Small Quantity Generator

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Violation Status: No violations found

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110003419300

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110003501121

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

MA-EPICS - Massachussetts Environmental Protection Integrated Computer System

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE

RITE AID 10197 (Continued) **1016141795**

FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

. Waste code:	D001
. Waste name:	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF

SHELL BRANDED GASOLINE SERVICE STATION (Continued) **1006808115**

LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

MA-EPICS - Massachussetts Environmental Protection Integrated Computer System

FINDS:

Registry ID: 110009589926

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Classification: Small Quantity Generator

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D018
. Waste name: BENZENE

. Waste code: F003

SHELL OIL CO WEST BOYLSTON PLT (Continued) **1000287760**

. Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Action Type:	Response Action Outcome - RAO
Action Status:	RAO Statement Received
Action Date:	10/1/1997
Response Action Outcome:	A permanent solution has been achieved. Contamination has been reduced to background or a threat of release has been eliminated.
Action Type:	RLFA
Action Status:	FLDRAN
Action Date:	10/6/1999
Response Action Outcome:	A permanent solution has been achieved. Contamination has been reduced to background or a threat of release has been eliminated.
Action Type:	An activity type that is related to an Audit
Action Status:	Notice of Non-compliance related to an Audit
Action Date:	11/30/1999
Response Action Outcome:	A permanent solution has been achieved. Contamination has been reduced to background or a threat of release has been eliminated.
Action Type:	Compliance and Enforcement Action
Action Status:	Notice of Non-Compliance Issued
Action Date:	11/30/1999
Response Action Outcome:	A permanent solution has been achieved. Contamination has been reduced to background or a threat of release has been eliminated.
Action Type:	Response Action Outcome - RAO
Action Status:	Level III - Comprehensive Audit
Action Date:	11/30/1999
Response Action Outcome:	A permanent solution has been achieved. Contamination has been reduced to background or a threat of release has been eliminated.
Action Type:	Release Disposition
Action Status:	Reportable Release under MGL 21E
Action Date:	7/29/1997
Response Action Outcome:	A permanent solution has been achieved. Contamination has been reduced to background or a threat of release has been eliminated.
Action Type:	A Notice sent to a Potentially Responsible Party (PRP)
Action Status:	FLDISS
Action Date:	7/29/1997
Response Action Outcome:	A permanent solution has been achieved. Contamination has been reduced to background or a threat of release has been eliminated.

. Waste code: MA01
. Waste name: MA01

Historical Generators:
Date form received by agency: 02/15/2012
Site name: FORMER SOMERSET POWER LLC
Classification: Not a generator, verified

Date form received by agency: 03/30/1999
Site name: FORMER SOMERSET POWER LLC
Classification: Small Quantity Generator

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

. Waste code: D003
. Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

. Waste code: D007
. Waste name: CHROMIUM

. Waste code: D008
. Waste name: LEAD

. Waste code: D009
. Waste name: MERCURY

. Waste code: D018
. Waste name: BENZENE

. Waste code: D039
. Waste name: TETRACHLOROETHYLENE

Action Type: Release Abatement Measure
Action Status: Completion Statement Received
Action Date: 4/3/2009
Response Action Outcome: A permanent solution has been achieved. Contamination has not been reduced to background.

Release:

Release Tracking Number/Current Status: 4-0012164 / RAO
Primary ID: Not reported
Official City: FALL RIVER
Notification: 05/07/1996
Category: 72 HR
Status Date: 12/24/1996
Phase: Not reported
Response Action Outcome: A2 - A permanent solution has been achieved. Contamination has not been reduced to background.
Oil / Haz Material Type: Oil

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 07/17/2018

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Data Arrived at EDR: 02/02/1994

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/07/2016

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

BROWNFIELDS: Completed Brownfields Covenants Listing

Under Massachusetts law, M.G.L. c. 21E is the statute that governs the cleanup of releases of oil and/or hazardous material to the environment. The Brownfields Act of 1998 amended M.G.L. c. 21E by establishing significant liability relief and financial incentives to spur the redevelopment of brownfields, while ensuring that the Commonwealth's environmental standards are met. Most brownfields are redeveloped with the benefit of liability protections that operate automatically under M.G.L. c. 21E.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 08/10/2018
Date Data Arrived at EDR: 08/10/2018
Date Made Active in Reports: 09/10/2018

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Southeast Map:	5642117 FALL RIVER EAST, MA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

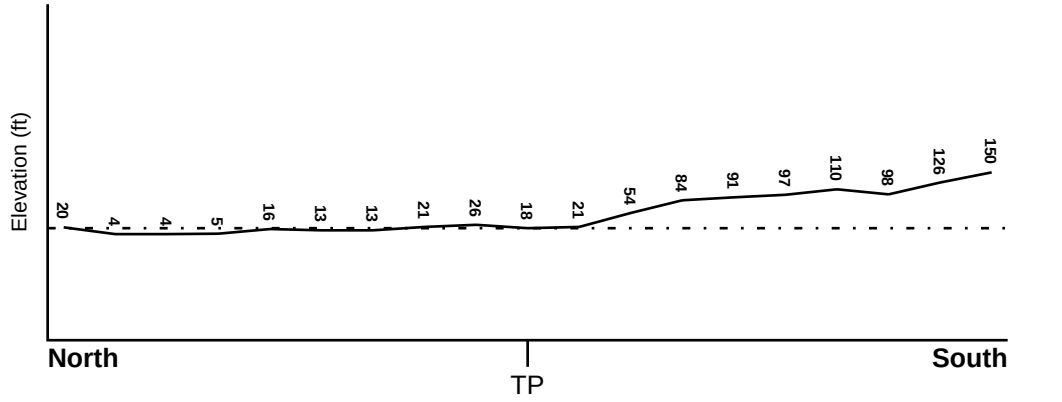
TOPOGRAPHIC INFORMATION

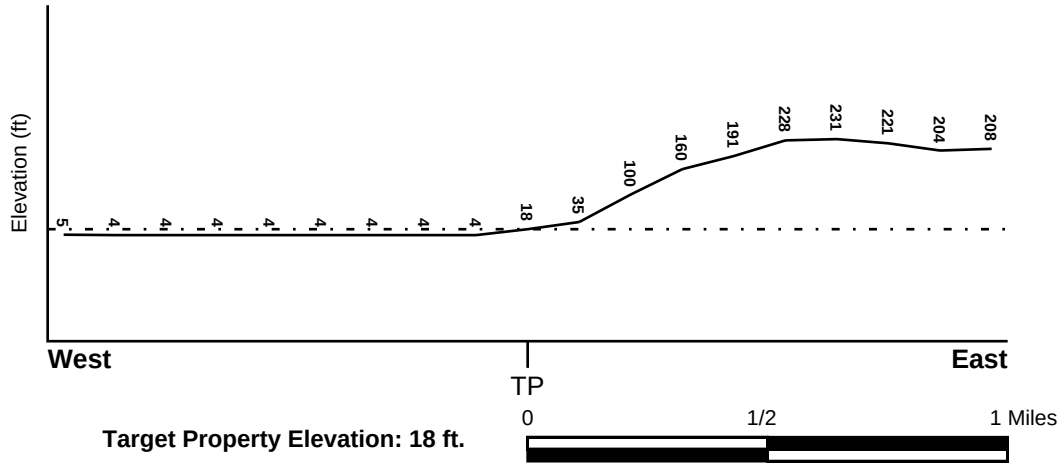
Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WNW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES





Target Property Elevation: 18 ft.

0 1/2 1 Miles

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
25005C0333G	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
25005C0331G	FEMA FIRM Flood data
25005C0332G	FEMA FIRM Flood data
25005C0334G	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
FALL RIVER	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
C16	1/2 - 1 Mile NNE	VARIES
F39	1/2 - 1 Mile SSW	NW
73	1/2 - 1 Mile SSE	SE
1G	1/2 - 1 Mile NNE	VARIES
2G	1/2 - 1 Mile SSW	NW
3G	1/2 - 1 Mile SSE	SE

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 2

Soil Component Name: Water

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: MassDEP
Telephone: 617-292-5907

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Massachusetts Geographic Information System (MassGIS) Datalayers
Source: Executive Office of Environmental Affairs

Public Water Supply Database: The Public Water Supply datalayer contains the locations of public community surface and groundwater supply sources and public non-community supply sources as defined in 310 CMR 22.00.

OTHER STATE DATABASE INFORMATION

Areas of Critical Environmental Concern Datalayer: The Areas of Critical Environmental Concern (ACEC) datalayer shows the location of areas that have been designated ACECs by the Secretary of Environmental Affairs. ACEC designation requires greater environmental review of certain kinds of proposed development under state jurisdiction within the ACEC boundaries. The ACEC Program is administered by the Department of Environmental Management (DEM) on behalf of the Secretary of Environmental Affairs. The Massachusetts Coastal Zone Management (MCZM) Office managed the original Coastal ACEC Program from 1978 to 1993, and continues to play a key role in monitoring coastal ACECs. Procedures for ACEC designation and the general policies governing the effects of designation are contained in the ACEC regulations (301 CMR 12.00). The ACEC datalayer has been compiled by MCZM and DEM and includes both coastal and inland areas.

EPA Designated Sole Source Aquifers Datalayer: The Sole Source Aquifer datalayer was compiled by the Department of Environmental Protection (DEP) Division of Water Supply (DWS). Seven Sole Source Aquifers have been designated by the US Environmental Protection Agency (EPA) for Massachusetts. A Sole Source Aquifer (SSA) is an aquifer designated by US EPA as the sole or principal source of drinking water for a given aquifer service area; that is, an aquifer which is needed to supply 50% or more of the drinking water for that area and for which there are no reasonably available alternative sources should that aquifer become contaminated. The aquifers were defined by a EPA hydrogeologist.

Aquifers Datalayer: MassGIS produced an aquifer datalayer composed of 20 individual panels, generally based on the boundaries of the major drainage basins. Areas of high and medium yield were mapped. This datalayer includes polygon attribute coding to help in the identification of areas in which cleanup of hazardous waste sites must meet drinking water standards, as defined in the Massachusetts Contingency Plan (MCP) (310 CMR 40.00000).

Non-Potential Drinking Water Source Areas: Non-Potential Drinking Water Source Areas (NPDWSA) are regulatory in nature, representing one of many considerations used in determining the standards to which ground water must be cleaned in the event of a release of oil or hazardous material. NPDWSAs are not based on existing water quality and do not indicate poor ambient conditions.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

DEP Approved Zone IIs Datalayer: The Department of Environmental Protection (DEP) approved Zone IIs datalayer was compiled by the DEP Division of Water Supply (DWS). The database contains 281 approved Zone IIs statewide. As stated in 310 CMR 22.02, a Zone II is "that area of an aquifer which contributes water to a well under the most severe pumping and recharge conditions that can be realistically anticipated (180 days of pumping at safe yield, with no recharge from precipitation.) It is bounded by the groundwater divides which result from pumping the well and by the contact of the aquifer with less permeable materials such as till or bedrock. In some cases, streams or lakes may act as recharge boundaries. In all cases, Zone IIs shall extend up gradient to its point of intersection with prevailing hydrogeologic boundaries (a groundwater flow divide, a contact with till or bedrock, or a recharge boundary)." These data are used in association with the Public Water Supplies datalayer. The following describes certain unique features of this association.

- Any proposed new well which will pump at least 100,000 gallons per day must have a Zone II delineation completed and approved by DEP prior to the well coming on line.
- Additionally, a new source may not be on-line yet, but other, older wells may fall within its Zone II boundary.
- Further, existing wells must have a Zone II delineated as a condition of receiving a water withdrawal permit under the Water Management Act.

RADON

State Database: MA Radon
Source: Department of Health
Telephone: 413-586-7525
Radon Test Results

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by GEI Consultants, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by GEI Consultants, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by GEI Consultants, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by GEI Consultants, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by GEI Consultants, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Search Results:

Year	Scale	Details	Source
